

Windows Deployment Services Worksheet

So you're thinking about upgrading your workstations to the latest version of Windows, called Windows 7! This worksheet will help you walk through the questions you will need to answer in order to determine if our deployment services are cost effective for you.

| Component | Cost | Qty | Total |
|---|-----------|-----|-----------|
| One-Time Environment Setup Fee | \$1200.00 | 1 | \$1200.00 |
| Workstation Upgrade Service (Per Workstation) | \$95.00 | | |
| Windows 7 License Options (Choose 1) | | | |
| Windows Professional Only | \$175.00 | | |
| Windows Professional with Software Assurance | \$275.00 | | |
| Microsoft Office Options (Choose 1) | | | |
| Office Professional Plus – License Only | \$470.00 | | |
| Office Professional Plus – License & SA | \$730.00 | | |
| Office Standard – License Only | \$350.00 | | |
| Office Standard – License & SA | \$550.00 | | |
| Total | | | |

Requirements

1. Minimum of 5 machines must be upgraded. This is a Microsoft Volume Licensing Requirement.
2. The machines being upgraded are less than 3 years old.
3. Additional charges of \$25.00 per application apply for installation of non-volume license Microsoft Office applications.
4. Microsoft Server 2003 or later and a minimum of 50 GB of available storage space within the network.
5. All machines being upgraded are required to be physically located within the network infrastructure at the time of the upgrade and must be owned by your organization.
6. All line of business applications must be deployable from a network location and standardized for all users, an additional \$25.00 per instance charge may apply to any application that does not fit this requirement.
