Security+

Your business is threatened everyday, whether you realize it or not.

Protect Your Business with Security+

In the past, cybercriminals disrupted businesses like yours solely for the notoriety of doing so. This is no longer the case.

The advent of ransomware and other “file loss” malware has taught hackers that their labor can be lucrative. Organizations large and small are falling victim to attacks targeting their end-users.

Without proper threat education, perimeter security, and breach detection, all businesses are vulnerable.

But you don't have to be.

So That Your Business Can Thrive

We've helped hundreds of businesses develop a more productive, efficient, and technically secure environment. We'd love to help you do the same.

Counter the Threats

Stop Hackers in Their Tracks

We know the damaging effects a cyber attack can have on businesses, schools, and governments alike.

The potential damage is only a click away.

You need an end-to-end solution that mitigates the risk of an attack and puts you confidently in charge of the future of your business.

What is Threat Hunting?

Threat hunting tracks down attackers in your digital environment and stops them in their tracks before they have the chance to cause real damage. It's one of the ways ITonDemand works proactively to protect your business.

The Impact of Cyber Crime

Enterprises account for **81%** of all ransomware attacks.

\$8,500/hour due to ransomware induced downtime.

Ransomware creates a new victim **every 14 seconds**.

Spearphishing attacks could not be distinguished by **9 out of 10 employees**.

It takes businesses an average of **196 days to detect a breach**.

We'll Do It *Together*

Don't end up as a statistic.

Security+ by ITonDemand offers your business 8-stage cybersecurity and threat prevention designed to minimize both the probability and the damage of a successful attack.

We seek out threats against your business proactively while deploying your technology stack with best practice policies and providing 24/7 monitoring from our SOC.

The dream of a secure business is only a few steps away.

Designed for Your Success

Diligence and attention to detail led to Security+ by ITonDemand being recognized as one of the top managed security services in the world in 2019 by the cybersecurity publication, MSSP Alert.

Our *Process*

1. Discovery

We provide you with an initial onsite security and network assessment of your security needs.

2. Strategy

We tailor our proven security platform to address vulnerabilities and meet the needs of your business.

3. Solution

Our security team provides ongoing monitoring and your business thrives, rain or shine.

Services and Support

Advanced Information Protection

We reduce your business' attack surface by classifying sensitive data and managing those that can access it.

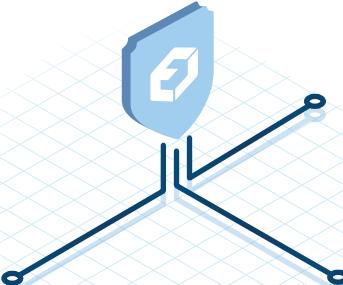

Educate and Simulated Phishing

Prepare your staff with security education, training, and testing on how to handle the threat of phishing and other end user focused malware.

Advanced End-Point Security

Proactively protect, detect, and respond to threats hiding within your endpoints, data centers, or cloud environments. Our breach detection service hunts for the unaddressed techniques hackers use to gain access to your systems.

Advanced Email Security

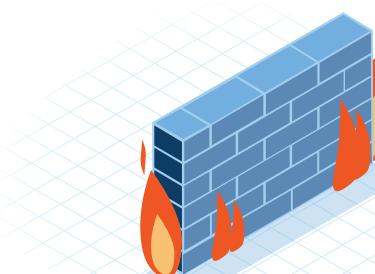

Start trusting your inbox again. We provide your business with advanced email security that includes robust filtering, managed SPF/DKIM, and outbound email encryption.

We reduce the risk of your organization falling victim to phishing or malicious emails.

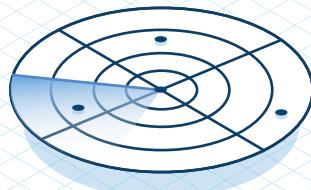

Advanced Edge Security with Managed SIEM

Protect the perimeter of your digital environment through advanced firewall management, AI-driven SIEM, and end-user content filtering.

Security Operations Center as a Service (SOCaaS)

A dedicated rapid response officer and team monitor your organizations resources. We secure your data, devices, and network in the event of a detected intrusion or malicious intent.

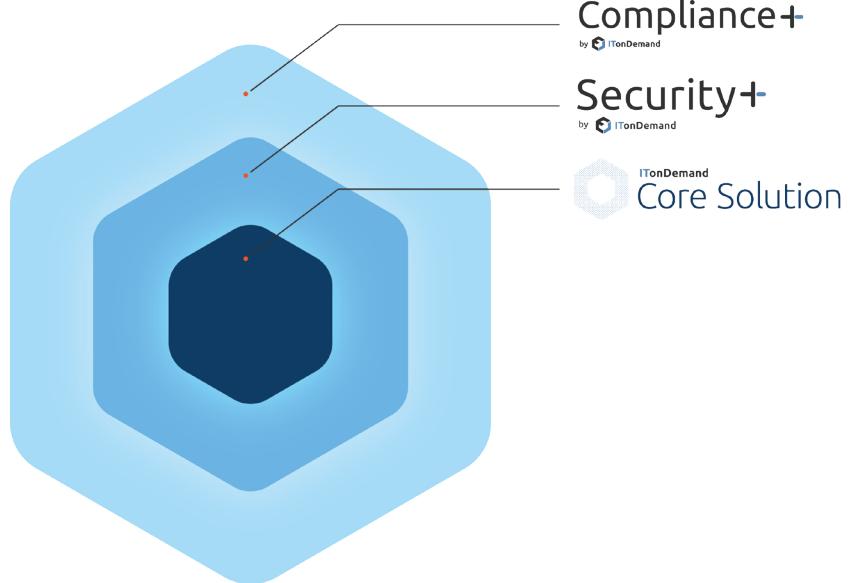

Our Tiered Approach

Security Centered / Service Driven

All our services are designed with security in mind.

Our service offerings are tiered to meet the security needs of your business with each service building on the last.

Core provides a base layer of fundamental Security Essentials. Security+ provides advanced security measures to further mitigate the risk of a cyber attack. Compliance+ is a bespoke service designed for businesses that must meet specialized compliance requirements.
